

FIT FOR FUTURE: THE NEW MONTA PAPER TAPE

FIBRE BASED BACKING AND STRONG ADHESION

Our new Greenline paper adhesive tape impresses with its optimised adhesive formula and its new, smoother paper backing made from chlorine-free (ECF) bleached pulp sourced from sustainable forestry. Our silicone-free paper adhesive tape is a viable alternative to plastic-based packaging tapes due to its natural rubber adhesive with high adhesive strength and immediate tack. It adheres reliably even when applied in a single layer, and is perfect for the permanent closure of light to medium heavy cardboard boxes, as well as mailing bags, pouches and cartons.

As a medium for advertising, it offers a clear print image, hence maximises the impact of brand messages. It is also pleasantly quiet and easy to unwind.

The new monta paper adhesive tape is an ergonomic, mono-material packaging solution for anyone looking for a plastic-free adhesive tape or a flexible, user-friendly alternative to water activated tape.

For a more natural look, monta 843 with its brown backing and transparent adhesive is the ideal choice. For particularly high-quality print results, monta 852 with a white adhesive on pure white paper is available.

PROPERTIES

- Very high adhesion and immediate tack on various carton qualities
- Silicone free, free from synthetic plastics
- Easy and low noise unwinding
- Tearable by hand
- Printable, also with waterbased ink
- Temperature resistance up to +60°C short-term, after application at room temperature
- Good weatherability and moisture resistance
- Recyclable with carton

Available as hand, machine and print rolls on monta Greenline core: 30m x 50mm, 500m x 50mm, 500m x 150mm.

TECHNICAL DATA	METRIC		IMPERIAL
