

SINGLE SIDED FOAM TAPES for Electrical Switchboards

SEALING · GASKETING · VIBRATION CONTROL

NEOPRENE | EPDM | PVC/NITRILE

Seals out dust & water

Keeps dust and moisture ingress away from cabinet doors and panels.

Stops panel rattle

Damps vibration in transit and in service.

Protects components

Cushions internals and mating metal surfaces.

Supports IP Rating

Foam tape helps your enclosure achieve and hold its IP rating (AS 60529).

FOAM TAPES

Neoprene

THE ALL ROUNDER

Resists oils, grease and hydrocarbons, with excellent compression recovery so it keeps sealing cycle after cycle.

Use it for door and panel perimeters, panel joints, anti rattle pads, and anywhere oils are present.

Kwikseal 6100

Closed cell neoprene · 1.6mm to 19.0mm

EPDM

THE WEATHERPROOFER

Outstanding UV, ozone and weather resistance, excellent water and steam sealing, strong electrical insulation, widest temperature range of the three.

Use it for outdoor boards: pillar boxes, kiosks, rooftop, coastal and high UV sites. Keep away from oils and fuels.

Kwikseal 6200

EPDM foam · 1.6mm to 12.7mm

PVC/Nitrile

THE TOUGH SPECIALIST

Seals air, dust, moisture and water, conforms to irregular surfaces, with top tier shock absorption and flame resistance.

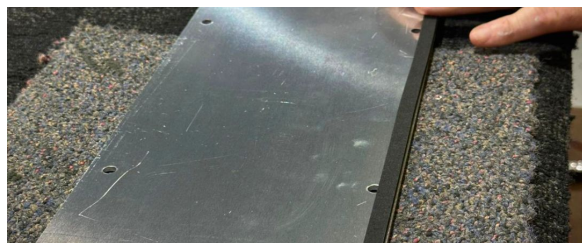

Use it for economical indoor sealing, uneven surfaces and vibration prone mounting. Indoor or shielded use only.

Kwikseal 8100

PVC/Nitrile foam · 3mm to 13mm

WHERE IT GOES

Cabinet door perimeter	primary dust and water seal	NEOPRENE / EPDM
Access panels and covers	seal plus rebound	NEOPRENE / EPDM
Gland plates and cable entries	around penetrations	NEOPRENE
Panel to panel joints	dust seal and anti rattle	NEOPRENE
Busbar covers and barriers	cushioning	NEOPRENE / NITRILE
Component and DIN rail pads	vibration damping	NITRILE / NEOPRENE

Ask about bulk pricing

Slit or cut to order from 6mm to 1000mm wide. Helps your enclosure achieve and maintain its IP rating under AS 60529.
